Welcome to Howe Gardens

Spring, after a long, hard winter, brings promise of an abundance of new and exciting things in our Daylily and Iris gardens.

Each year we add many of the newer varieties, but we always keep the best of the old favorites.

Our strong, blooming-size plants and extras will please you, the same as they have pleased many others in the past years.

Come and visit with us if you can. The Iris will be at their best around June 10 and we will have Daylilies in bloom from Iris time until frost, although you will see the most color during July and early August.

Even the cares of this troubled world can be forgotten amidst the beauty in a garden of flowers.

Daylilies

Daylilies in your garden give so much beauty for the little attention which they require, that you should not be without them.

Adaptable to all types of soils and sections of our country and free of attacks from insects and disease, they will give you colorful bloom even during the hottest weather.

Now available in a wide range of colors and flower form, you may choose early, midseason and late varieties; being assured of bloom from spring until frost.

If we do not list a variety you are interested in, ask about it, for we may have it.
